Education

- **Faculty of Mechanical Engineering** | University of Belgrade
Completed in 2018
Bachelor of Science in Mechanical Engineering

Skills

- **Frontend:** HTML, CSS, JavaScript, React, Astro, TypeScript
- **Styling:** Material UI, Bootstrap, Tailwind
- **Tools:** Git, GitHub, Astro, Vercel, Netlify
- **CMS & Backend:** WordPress, PHP, MySQL
- **Other:** REST APIs, Responsive Design, Email Development

Languages

- English - professional working proficiency
- Serbian - native

Profile

I build websites, landing pages, and email templates — using React, plain HTML/CSS, whatever the project needs. Been doing it for **3+** years at a fintech company where I've shipped over **150** pages and **100** email templates. Former mechanical engineer, so precision is second nature.

Work Experience

2023 - Present

Fortrade | Belgrade

Web Developer/ PPC Marketing

- Made 150+ landing pages for ad campaigns, used across 10+ countries
- Built blog sites in React that pull content from WordPress — search, categories, routing, the whole thing
- Made 100+ email templates that work everywhere — Gmail, Outlook, even older clients. Used in automated marketing campaigns.
- Worked closely with designers and marketing people to turn campaign ideas into actual pages and emails

Projects

- **Top500AI** — React site that lists AI tools. Has search, category filters, and video content. Pulls data from WordPress. [top500ai.com]
- **Compare Best Brokers** — Broker comparison site built in React. You can filter and compare brokers by different criteria. Data comes from WordPress. [comparebestbrokers.com]
- **Portfolio Website** — React, Framer Motion, Material UI. Animated dark/light theme with prefers-color-scheme detection, contact form, and smooth page transitions. [veljko-dev-2025.netlify.app]

Other Experience

CNC Programmer/Operator | 2018–2022, Belgrade

- Programmed and operated CNC machines for aerospace components and centrifugal pump manufacturing, working within tight tolerances.
- Developed systematic approach to precision machining that now informs my detail-oriented coding practices.
